Skills

- **Languages**: C++, Java, SQL, Python
- **Data Science Libraries**: NumPy, Pandas, Matplotlib, Seaborn
- **Soft Skills**: Analytical Thinking, Problem Solving, Team Collaboration, Adaptability
- **Data Visualization Tools**: Power BI, Microsoft Excel

Projects

- **VGS – Delivery Tracking & Wishlist Platform**
  May' 2025 – Jun' 2025
  - Built a full-stack delivery tracking system with OTP-based authentication, wish list management, and real-time order status updates.
  - Developed a responsive React UI and Express.js backend for smooth user experience and secure data flow.
  - Integrated a chatbot to handle general queries, order verification, and wish list additions, improving user engagement.
  - Designed a wish list module to boost user retention and simplify repeat ordering.
  - Delivered a scalable and secure platform, demonstrating end-to-end development skills and modular architecture.

  Tech: React.js, Express.js, Node.js, MongoDB, OTP Auth, Chatbot.

- **Accidental Drug-Related Deaths (2012–2024) (Power BI):**
  2026 – Jan' 2026
  - Analyzed 12 years of accidental drug-related death data to identify mortality trends, high-risk demographics, and emerging substance patterns.
  - Built an interactive Power BI dashboard using advanced DAX, data modeling (star schema), and Power Query transformations to generate actionable public health insights.
  - Performed poly-substance detection, geospatial hotspot mapping, and behavioral text analysis to support data-driven decision-making.

  Tech: Power BI, DAX, Power Query, Data Modeling, ETL, Geospatial Mapping, Heatmaps, Text Analytics

Summer Training

- **Cipher Schools:** Jun' 2025 – Jul' 2025
  - Completed an intensive 70-hour training focused on mastering core Machine Learning concepts, including data preprocessing, model training, evaluation, and deployment using Python.
  - Built practical ML-based applications such as a chatbot and an image classification system, applying algorithms like logistic regression, decision trees, and neural networks.
  - Strengthened analytical and problem-solving skills through hands-on projects, real-world datasets, and iterative model improvement.

  Tech: Python, Machine Learning, Data Preprocessing, Model Evaluation, Chatbot Development, Image Classification

Certificates

- NPTEL: Cloud Computing | Certificate — October' 2025
- Infosys: Built Generative AI Apps and Solutions | Certificate — September' 2025
- neoColab: CPP Programming| Certificate — July' 2025
- neoColab: Java Programming | Certificate — May' 2025
- neoColab: Data Structures and Algorithms | Certificate — December' 2024
- SimpliLearn: Business Analytics with Excel | Certificate — April' 2024
- Outskill: Generative AI Mastermind |Certificate — March' 2026

Education

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.11*** — *Since Aug' 2023*
  Minor: Data Science
- **S.D Public School** — Muzaffarnagar, Uttar Pradesh
  Intermediate; ***Percentage: 65.8%*** — *Mar' 2023*
- **S.D Public School** — Muzaffarnagar, Uttar Pradesh
  Matriculation; ***Percentage: 85.3%*** — *Mar' 2021*
